## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Ide et al. (JP402094784a).

Regarding claim 1, Ide discloses a projection display device showing the visible surface 12, a concealed surface (6, 7), and a jack panel (34, 12).

Regarding claim 2, Ide shows an accessible panel 11 and openable access panel 8. The element 12 also includes an accessible door panel opening to another front input jack panel.

Regarding claim 3, Ide shows a screen 24 and cabinet frame (1). The access panels 11 and 8 are attached to the cabinet frame.

Regarding claim 4, the speaker grille 11 is attached to the cabinet frame by ball catches.

Regarding claim 5, note Figure 2 in Ide.

Regarding claim 6, Ide further shows an access door panel (6, 7) which can be used to access the jack panel at the back.

Regarding claim 7, the electrical connectors can be connected to the jack panel at the back through the opening 7 from the front.

Regarding claims 8-13, in addition of above, Ide still meets the claimed invention when interpreted broadly. For instance, in Ide, the cabinet cavity 15 meets the jack panel cavity, the opening (6,7) meets the back surface connector opening, the opening 8 meets the front surface access opening, and the speaker grille 11 meets the front surface access opening cover.

### ***Response to Arguments***

3. Applicant's arguments filed 7/13/09 have been fully considered but they are not persuasive.

Regarding applicant's argument that the jack panel 34 in Ide is only accessible via concealed surface 6 and is not accessible from the visible surface, the Examiner disagree. First of all, for argument sake, assuming applicant's argument is correct, Ide still meets the claimed invention because it has at least one surface (the surface 6) accessible to the jack panel 34. Second of all, the jack panel 34 in Ide is also accessible through opening 15 because a user can reach the jack panel 34 in front of the screen through opening 15. Finally, the jack panel 34 is also accessible from the visible surface 12 by going around surface 4, provided that the user has a long arm. In view of foregoing, it is clear that Ide still meets the broadly claimed invention and therefore, the office rejection stands.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
